

Lindsay Duff

-Artist Statement-

My art is a reflection of our present consciousness. It's deliberate but also an inspired deliberateness. As the human consciousness unfolds I feel an opportunity arising, like eagerly awaiting an exciting adventure, and the need to capture its essence using the most compelling medium at the time.

I've always lived my life in a creative way, so everything I see becomes a possibility for a painting. Relationships and the beauty of nature inspire me. I intuit the vibrant colors and shapes of different paints and textures to create new realities, and add special papers I find among my travels. My paintings are a reflection of the mystery and magic of everything around us.

To have the pleasure and honor to put my visions into form so others can experience my art in their own unique way, allows me to connect to the highest, purest part of myself. I am joyful and timeless when I create.
